OUTDOOR LIGHTING

Hello,  
nice to meet you  
we are

LUTEC

CONNECTED BY LIGHTING

one LUTEC,  
one **lighting** world

We believe outdoor lighting is a unique category with a vast number of specific requirements and challenges. Our aim is to provide creative solutions and innovative designs, using quality materials and components.

**At LUTEC we truly focus and comprehensively embrace exterior lighting.**

Our categories include, Architectural designs with creative forms of illumination. Functional products that combine tough materials with stylish appeal. Decorative products ranging from period classics to ultra-modern shapes and Solar lighting that incorporates the latest trends, alongside unique technologies, all to support the ever changing climates around the World.

LUTEC now leads the market in connected exterior lighting with LED Outdoor, LED Solar and LED Camera lights. Featuring products to secure your home and to enhance the appearance of any exterior, using flexible mood lighting, colour changing, dimming and scene setting, all controlled via our Apps.

One world, different faces, different segments developed with the same concern for quality and efficiency.

discover what's new

# Looking for special light effects

LUTEC is introducing a number of new contemporary outdoor items, each of them having a specific and distinctive light effect: Narrow light rays or wide beams, charming glows, powerful spots. Resulting in the perfect solution to consumer needs for their outdoor lighting installations.

## A Swiss Army Knife Luminaire

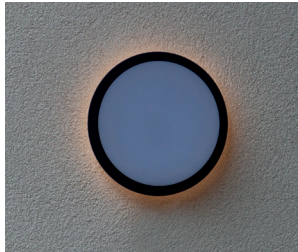

The GOLETA is the hero of the new collection. An elegant wall & ceiling LED light with many options. Eccentric moveable head, warm white light to day light switch, front light, back light or both. It's your choice.

## Up & Down Lights Revisited

CYPRES & MARBO designs, showing updated possibilities for up & down lighting. Suitable for GU10 retrofit spot lights. The ideal solution to create distinctive light patterns around your house.

## Extreme Flat Design

The RIALTO wall light can be seen as the elegant combination of two GEMINI XF luminaires. Resulting in a wide, powerful beam of downwards light and the option to choose from 3 different beam patterns to light upwards.

## enjoy the solar side of light

LUTEC has a variety of different concepts covering the complete solar energy category. This year, our range has been expanded with the addition of brand new and attractive Solar outdoor LED lighting options.

### **No electricity consumption – No electric wiring**

100% green renewable solar energy. Hassle free and super fast installation, avoid costly electrical wiring installations in your garden or around your house.

### **Classical lanterns**

New to the range are the Solar versions of the popular traditional series FIA & FLAIR. Including a dedicated retrofit LED filament bulb suitable for low voltage Solar light fixtures.

### **Charming summer nights**

KOZY & DIVA Solar table lights create a gentle and unique light pattern. Excellent for converting your garden table in to a cosy family area, all night long!

### **Convenient, comfortable & personal**

The DIAS bollard light with spike is an excellent extension to the LUTEC connect Solar range. The perfect model to create and program the desired outdoor atmosphere for every occasion. Enhanced by LUTEC connect dynamic CCT & RGB colour changing technology.

## retrofit in a modern jacket

LUTEC is continuously extending its offer Outdoor luminaires suitable for retrofit bulbs. This allows consumers to freely decide which LED lamp to install or replace.

### Splendid light - versatile fixtures

New introduction of wall lights and bollard lights in different styles and materials featuring E27 & GU10 lamp holders.

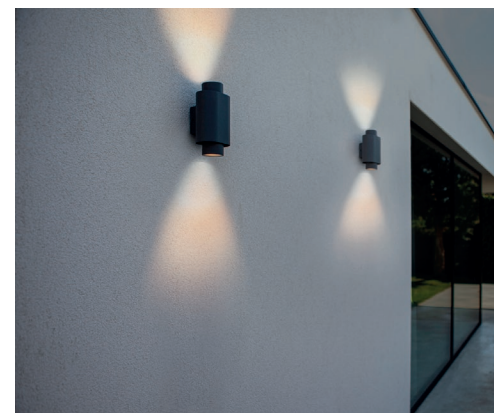

(Bulbs not included - Except for Solar LED lights)

### Towards Energy Class A

With the introduction of the new ERP regulations in September 2021, the bulbs industry is moving fast and steady towards Energy Class A retrofit bulbs for all available models.

### LUTEC connect solution

In order to complete your luminaire, LUTEC offers the most common LED retrofit bulbs as a service range. The LUTEC bulbs come with the LUTEC connect feature and are available in E14, E27 & GU10 sockets. Both Filament and RGB bulbs are in the portfolio.

# LUTEC new camera-lights: everything under **control**!

As market initiator, LUTEC is proud to present the 3rd generation of the connected camera light range, replacing in full the first 2 generations.

## Brilliant Lights & Superb Recordings

All-round range of decorative and functional camera light fixtures, powered for powerful lighting. High-definition video recording during day time and at night.

## Fast connection and Stable streaming

Thanks to the combination of Bluetooth MESH and WIFI technologies: Quick and convenient start-up process. Secure and solid Audio and Video streaming to your smart phone or tablet, wherever you are.

## Warm Welcome – Safe Home

With the LUTEC connect App, you can control all parameters and adjust all possible settings to assure a personal and comfortable environment for your family and your visitors in and around your home.

**LUTEC**  
connect

**EASY  
TO CONNECT**

Control & Adjust your lights  
from your bedroom to your garden

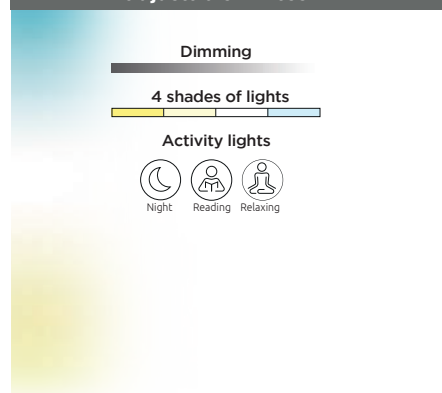

control your light like magic

LUTEC has a great range of smart connected lights, allowing you to immediately set the mood in and around your home with the magic of coloured light. Once you have connected your lights to your mobile phone, you can play with light to your hearts content.

**CCT**

adjustable whites

**CCT+RGB**

whites & colors

Vary the intensity  
and white temperatures

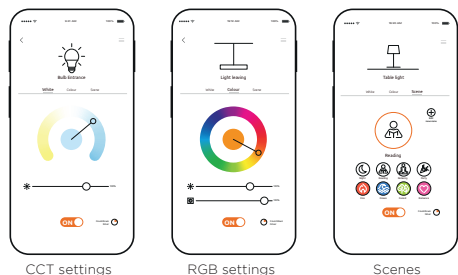

By varying the white temperature, you can go from a soft and pleasant warm white for relaxing or enjoying an evening with friends, to a cooler white simulating daylight and providing more powerful lighting.

Light in color

You can create a festive atmosphere, transform your terrace into a cosy and pleasant space, enhance your garden decoration or simply choose your favorite scene. A color and mood for any time of day or night.

# LUTEC SOLAR

finally solar lighting  
becoming smart!

**solar**

**connected**

- ☑ Energy Saving
- ☑ Easy installation  
no wires needed
- ☑ Higher lumen output
- ☑ Long life solar battery

- ☑ Easy to install,  
connect and control
- ☑ Fast & Stable bluetooth  
connection
- ☑ Lights are connected to each  
other via Bluetooth Mesh
- ☑ Range up to 50m
- ☑ Adjustable light settings
- ☑ Control by smart phone  
or motion sensor

Control and adjust  
your SOLAR lights

Switch your lights on or off,  
dim your lights, change the  
temperature or the color  
according to your mood.

High tech  
Low energy

Easy to control solar lights  
for better efficiency  
and comfort.

Create Groups for  
more convenience

Control all your lights at once!  
Easy and fast set up, you can  
add or delete any light from  
the group.

Manage the  
battery life

Check the battery level at any  
time. At low battery levels,  
switch easily from ON to PIR  
or OFF mode.

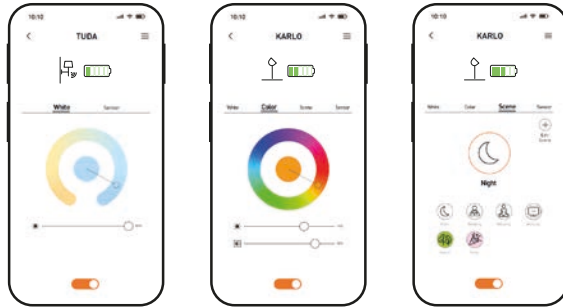

## Control and adjust your SOLAR lights

With the LUTEC connect App you can switch your lights On/Off,dim or change the color temperature easily.

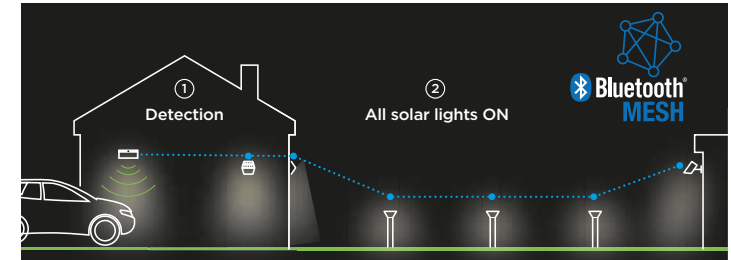

The led color feature available in either the bollard or spike, allows you to create your own personalised garden atmosphere, designing your outdoor space in style with colors or dedicated scenes.

## Create Groups for more convenience

From first detection at your driveway or path create a group which allows all lights to illuminate

Create a group with the Solar connect light through the APP.  
Thanks to Bluetooth MESH the lights can be easily linked and work simultaneously.

## High tech Low energy

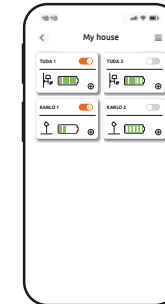

Within the application you can select OFF-AUTO-ON mode. Selecting AUTO mode activates the movement sensor, which enables the light to come on only when someone is passing and increases battery life from a single charge.

From the sensor menu you can :

- Activate the detection from near to the sensor to further away
- Set Twilight mode from dusk to dawn
- Choose light reaction time from 10 seconds to 3 minutes
- Constant light : Additional option to set your light output at 20% and also duration from 2 to 8 hours.

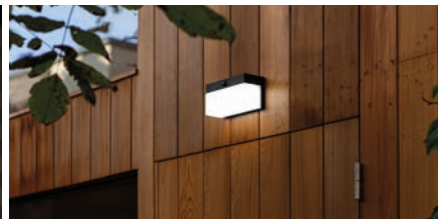

## Manage the battery life

This feature enables you to quickly check the battery level.  
You can decide to increase or decrease the brightness or switch to AUTO mode or even Off, allowing full user control.

800 Lumen	→	90 Minutes
80 Lumen	→	8 Hours

## nice to know

Longer light or more powerful light

- High efficiency monocrystalline or polycrystalline solarpanel
- LED module with strong light output: 100 lumen up to 500 lumen
- Li-ion rechargeable battery included
- Integrated dusk to dawn sensor, automatic switch to light-on during night
- Weatherproof materials and finishing

## how to choose

- solar panel**  
**Integrated**  
Compact, no extra wiring
- Separate**  
Higher solar energy capacity
- orientation of solar panel**  
**Fixed**  
The luminaire should be placed in the most optimal position; south orientation
- Adjustable**  
The panel can be oriented in the most efficient position; south orientation (tilt angle 35° in summer - 65° in winter)
- orientation of LED light**  
**Fixed**  
Diffuse light - Up & down light
- Adjustable**  
Directional spotlight
- clever control**  
**PIR motion sensor**  
Smart use of the available solar energy  
Always light when somebody is passing
- High-Medium-Low switch**  
Personalized choice to come to ideal combination of light output and autonomy
- DIM**  
The Light stays in low brightness all night and turns to high brightness when it detects motion.

# pops

## portable post

POPS LED Solar portable post. Straightforward design with dividable post and elegant white donut shaped diffuser. The big solar panel guarantees a powerful light during the night. Executed with a High-Medium-Low push switch giving you the possibility to extend the battery run time. The extra USB connection can be used for extra charging of the batteries.

- ✓ Adjustable motion Sensor
- ✓ See, talk and listen
- ✓ Easy to install, connect and control
- ✓ Create groups with other lights
- ✓ Voice control ready
- ✓ Recieve notifications

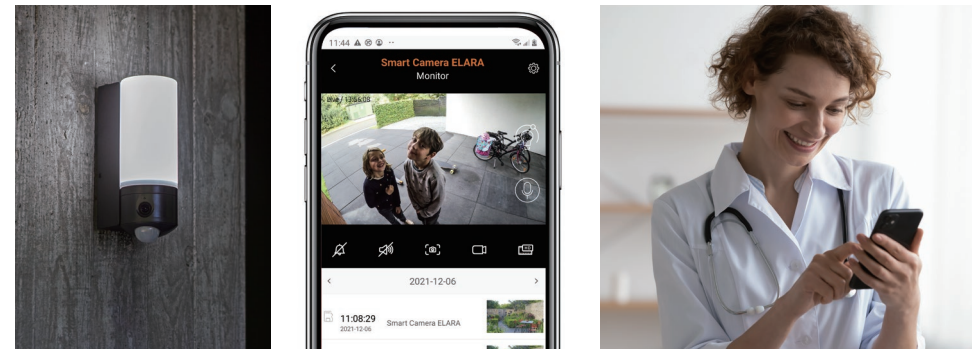

### Receive an alert when someone approaches your home

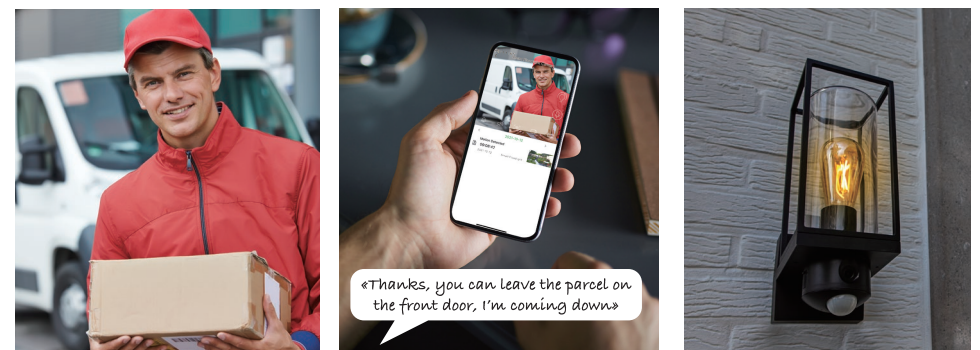

Get live notifications via your smartphone when someone approaches your door

### Keep an eye on your house anytime, anywhere

Enable you to take a picture or record a video from wherever you are.

### Listen and talk live with your visitors

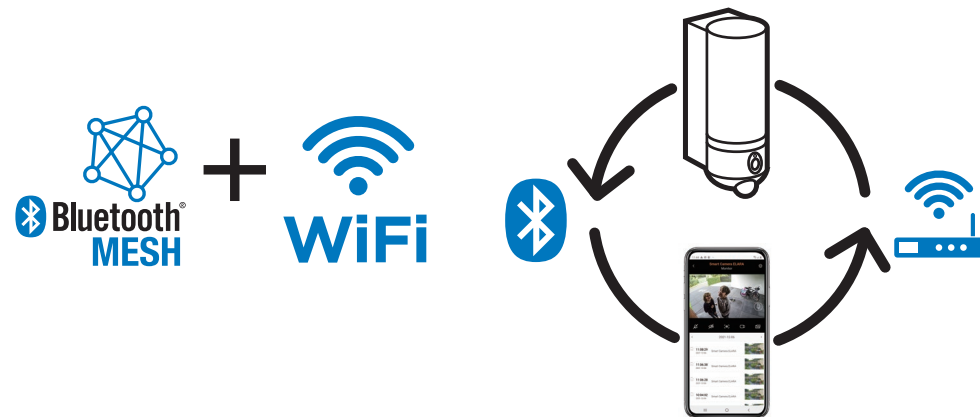

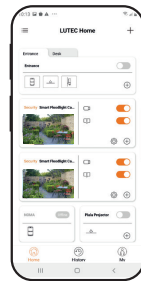

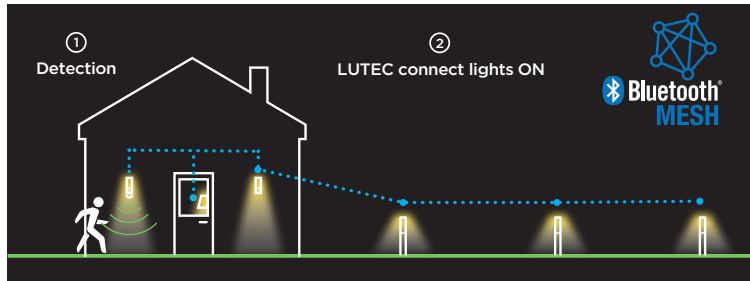

Talk with your delivery person, you will never miss your expected parcel

## Thanks to Bluetooth MESH

- Quick and easy to find the device and start the configuration process immediately
- Actively send feedback of a problem during the network configuration
- Create groups with your camera light and trigger other LUTEC connect lights on

**EASY TO CONNECT**

## Thanks to Wifi

Be notified and exchange with people away from home.

Keep in touch with home, images are accessible 24 hours a day from your smartphone.

Voice control ready  
Works with LUTEC access box sold separately.

## Powered for lighting

- Switch your lights on or off
- Dim your lights
- Change the colour temperature

## High definition camera

- High-definition video recording at night
- H265-video file size is halved
- Video playback and transmission speed are doubled
- Alert sensitivity: High, Medium, Low

**HD CAMERA**

## Adjustable motion Sensor

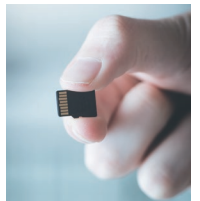

- Detection reach from near to far distance
- Twilight settings from dusk to dawn
- Light time reaction from 10 seconds till 3 minutes
- Constant light: Set your light output at 20% during all night

## Secure storage

- SD card already installed in the product
- Ready to use
- Storage capacity 16 GB
- Maximum storage capacity 128 GB

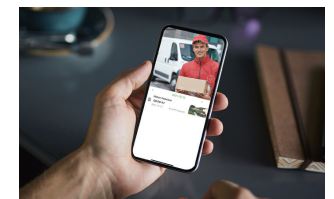

**SECURE STORAGE**

## See, talk and listen

Listen and speak to visitors from wherever you are.  
Trigger the siren straight from your app when there is an intruder.  
Start continuous recording to get view of the whole event

The range features, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house.

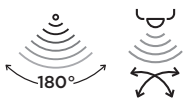

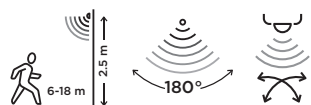

## Passive infrared (PIR) motion sensor

### How does it work?

A PIR sensor detects changes in the amount of infrared radiation and converts this changes into a switch-on signal.

When a person makes a movement within the detection reach, the sensor will detect a difference in infrared radiation in between the person's body and the environment.

## Comfortable detection area

The detection area is a combination of the reach in distance and angle. An adjustable sensor can be tilted and/or turned and gives you full freedom.

## Your personal settings

### Time setting

As from the moment the sensor detects a movement the light stay on from 10 seconds upon 8 minutes according your preference.

### Twilight setting

The environment brightness can be adjusted according your selection from night (10 lux) to daylight. In this way the light will switch into the "ON" position according the selected outside light level and not during the day.

### Distance setting

You can limit the detection distance in accordance with the desired detection area. In this way you can avoid a movement detection outside your private grounds.

## For your convenience

### Dusk to dawn

Automatic light on switching as soon it's dark outside

### Ambient Light

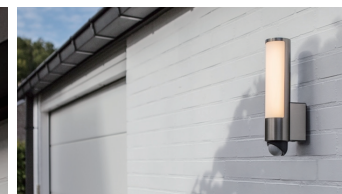

Light stays on all night long in a gentle ambient light, after movement detection the light switches on a powerful light beam.

### Double sensor

Assures you a full detection not only frontal but also underneath the luminaire close to the wall.

### Test mode

You can define the perfect detection area during installation in daylight situation

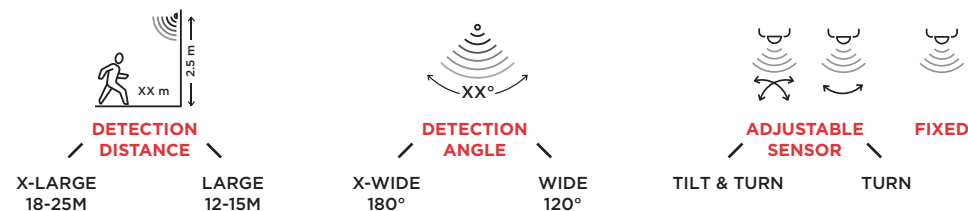

## How to choose?

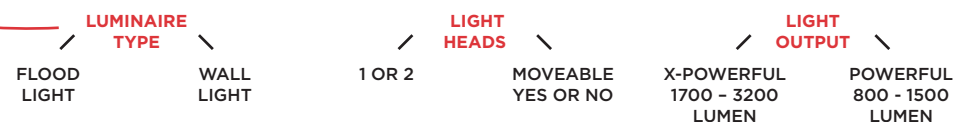

Check in a few steps which InMotion Security Sensor Light suits the best for your home situation.

## BASED ON SENSOR DETECTION REACH

## BASED ON LUMINAIRE CHARACTERISTICS

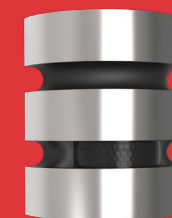

# maya

## wall

This compact Up & Down wall light with wide beam in aluminium with stainless steel cover has a timeless design. Discrete position of the black adjustable PIR motion sensor, makes it almost invisible.

# introducing our company

## 50 years of experience

### The origins of a lighting company.

Originally set up as a national aluminum die-cast factory, we gained our first experience of outdoor lighting by producing bulkhead lights & classical garden lanterns. The first export shipment was made in 1996. The new factory in Yuyao became operational in 2001, concentrating on modern garden and professional lighting.

The LUTEC brand was launched in 2010, focusing on architectural LED lighting and the introduction of solar energy products. The success of the company resulted in the opening of a second production facility in 2012, fully devoted to future developments in design and new technologies.

### Nowadays, Lighting is both essential and magic.

The challenge of the lighting market is to create products which are a balance between the shape, impact and attractiveness. The LED revolution has completely changed the game, giving many new opportunities. Added to this we must not only continue to offer the latest technical innovations but also anticipate and provoke them, especially with solar energy and smart lighting controls.

We have expanded our international network and organisation: with new central warehouses in Belgium and China, establishing partners in many new countries allowing us to continue building our corporate identity and providing our partners with unique product support and marketing tools.

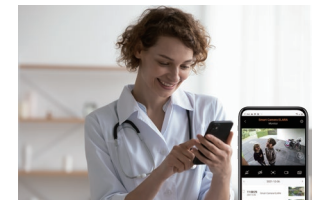

# welcome to the lutec center

## connected by lighting

### The Future is always here.

Today we are all surrounded by the interactive and connected world. For many reasons it is evident that the lighting market must also embrace this new internet age. The need of control has become a must have feature.

Temperature, colour, dimming, activity sensors and timing controls are the norm. Programmable solutions for energy saving, interactivity between multiple light points or installations are becoming standard. Security options with camera visions, live video, and recording are no longer a futuristic dream as LUTEC products can perform all of the above.

### WELCOME TO THE LUTEC CENTER

This is where the magic is born.

The LUTEC centre located our HQ in Yuyao is an international meeting venue where new concepts, innovation & strategies are studied, created and shared with our partners. Recently the virtual showroom can be accessed from anywhere on the globe.

We provide an expert platform in design, sales and services. Staying close to our customers, allows the right design solutions to be found for their consumers.

Our team is trained to be proactive and reactive. The key to realise a win-win product, is to explore all the possibilities, look outside the box to find the best solution.

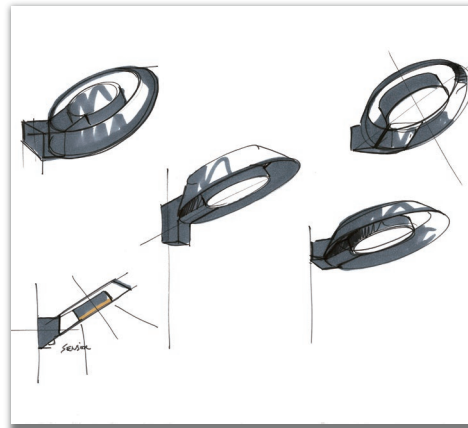

## design & engineering

design, engineering & manufacturing,  
all interactive.

One of the main decisions we have taken in the LUTEC organisation is to break down the walls between of each department to improve product strategy.

This brings a culture of flowing communication between the services where everybody has a positive role to play in all projects.

We all know development is complex with many obstacles to overcome however by working together helps our team to aim for the perfect solution as smoothly as possible. Knowledge is shared at all levels. Creativity, marketing, engineering, production, and sales are seen as one.

## warehousing & transport

global logistic footprint assuring  
availability & proximity.

Unlike many other manufacturers in this sector, LUTEC keeps significant levels of finished goods in the central warehouses in Europe and China. Our aim is to reduce the lead time wherever possible.

The European Central Warehouse is now fully operational for more than 5 years, resulting in a proven logistic performance with a service level well over 90%. Overtime the ECW portfolio has increased up to 350 sku's with permanent availability.

Thanks to this warehouse located in Belgium, centrally situated in Europe, with an average lead time for most shipments is less than 7 days, the LUTEC products are always within reach.

We offer different transport options: direct shipment, cross docking, drop shipment or pick-up. this in close co-operation with each local LUTEC partner.

Recently we've arranged an appropriate set-up to assure different value adding trade marketing services in the ECW.

### CCW

# LUTEC quality

As a global supplier, our products are fully compliant with all relevant technical & quality requirements of the different regions in the world.

All LUTEC LED products benefit from a 5-years functional warranty. For the SOLAR range we apply a standard 2-years operational warranty.

LUTEC Warranty Conditions, please check on [www.lutec.com/warranty](http://www.lutec.com/warranty)

## Integrated LED Light-engines

The LUTEC in-house engineering/production departments only use primary component suppliers, constantly improving the performance of the total LED product, resulting in a higher lumen/watt ratio.

**Low Energy Cost:** LUTEC products offer at least an 80% saving compared to traditional sources

**Long Lifetime:** up to 20.000 hours

LUTEC LED-light engines featuring the most appropriate characteristics in order to give the best result for all your outdoor applications.

- Lumen Maintenance: 100% LM-80 test report
- Color deviation: 100% under 5-step MacAdam ellipse

The LED driver is the heart of the LED module and is the main influencer of the life-time. LUTEC develops these drivers to the specification of the product for best performance. The production of the SMD's used in the LUTEC-drivers is done in-house in our approved SMT assembly lines. All drivers are compliant to all relevant standard and regulations.

# new ERP regulations 2021

## New EU regulation

The new EU regulation concerning Energy Efficiency for Lighting products involves New Energy Labelling regulations (EU) 2019/2015 and New Ecodesign requirements for light sources. (EU) 2019/2020. Overall objective of this updated regulation is to protect environment, improve durability of lighting products and strengthen consumer protection.

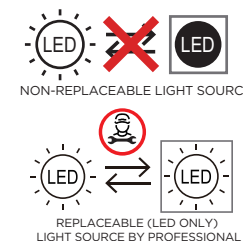

## LUTEC Outdoor Portfolio

All LUTEC outdoor luminaires within the scope of the new EU-regulation are fully compliant to the new regulations. This has resulted to the attribution of a new classification with Energy Efficiency Classes in between A & G.

## “Containing Products” Classification

The complete range of LUTEC luminaires has been classified as Containing Products with removable and (non) replaceable LED-module. As a result the new Energy Efficiency Class is related to the LED-Module and not to the complete luminaire as such.

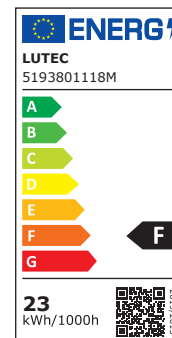

## LED Module – Energy Efficiency Class

In order to make it clear that the test results are related to the LED Module, a specific EEL label was created with a “M” (Module) indication behind the item nr.

This EEL label can't be shown on the packaging of the complete Outdoor Luminaire. In the Instruction Manual we indicated the Energy Class of the concerned light Source (= LED Module)

## EPREL Database

Consumers can access the database by scanning the QR code featured on the new energy labels. The EPREL database offers detailed information of all registered LUTEC products.

## Available information on [www.lutec.com](http://www.lutec.com)

On our LUTEC website all related information is available for consultation and easy download of specific documents:

- Energy Label
- Instruction Manual
- Product Information sheet (with test results)
- Light Source Remove instructions

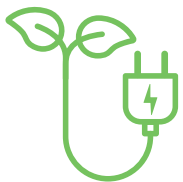

# LUTEC sustainable & environmental vision

We believe outdoor lighting is a unique category with a vast number of specific requirements and challenges. Our aim is to provide creative solutions, innovative designs using quality materials and products. Our categories include architectural designs with creative forms of illumination. Functional products, combining tough materials with stylish appeal, decorative products ranging from classic to ultra-modern shapes. Solar lighting that incorporates the latest trends alongside unique technologies. All this to support the ever changing climates around the world.

## Our commitments to everyday actions

### Durable Products

LUTEC outdoor luminaires are made from durable materials such as high density die-cast aluminium and synthetic glass, fully weatherproof, to **last for many years.**

### Zero-Plastic Packaging

LUTEC has started the complete **ban of plastic bags** in their consumer packaging as from mid 2021.

### Responsible Production & Operations

The roofs of LUTEC production facilities are equipped with high efficiency solar panels (10 000m<sup>2</sup>) resulting in a green energy saving : **50% of our annual energy consumption.**

### Sustainable Functions & Features

**LED Lights :** 80% less energy vs traditional light sources

**SENSOR Lights :** consume energy only when you need light

**CONNECTED Lights :** smart control of the lights can save up to 90%

### SOLAR Lights : 100 % green energy

Focus on development of efficient and smart Solar luminaires made with panels :

- Without any rare earth element
  - Can be recycled and reused up to 4 times
- Last year, more than 400 000 homes were equipped with a new LUTEC Solar light.

# materials & finishes

LUTEC exterior luminaires are produced using high quality materials and finishes with excellent weather protection properties as well as mechanical strength to ensure a long lifetime.

Heavy duty die-cast Aluminum (ADC 12) with a thickness of 2mm, is in most cases the preferred material. The LUTEC in-house fully automatic powder-coating & water painting installation provides excellent protection against corrosion.

Different kind of durable synthetics, depending on the application and form factors. For the fixtures: ABS, a strong and light-weighted material, can be used under low and high outdoor temperatures. For the opal or transparent diffusers: the impact proof and very resistant PC (polycarbonate) is used. Also clear glass, tempered glass and opal or clear PMMA (plexi-glass) are common in our designs.

LUTEC benefits from an in-house tooling workshop for both aluminum and synthetic components.

## IP rating table

The LUTEC Outdoor fixture complies to the International standards concerning Ingress Protection. All articles have a minimum IP44 rate. For some specific applications (Ex. in ground recessed spots) the protection rate goes up to IP67.

	Protection against solids		Protection against liquids
0	Not Protected	0	Not Protected
1	Protected against Solid Objects greater than 50mm	1	Protected against Dripping Water
2	Protected against Solid Objects greater than 12mm	2	Protected against Dripping Water when tilted to 15°
3	Protected against Solid Objects greater than 2.5mm	3	Protected against Spraying Water
4	Protected against Solid Objects greater than 1mm	4	Protected against Splashing Water
5	Dust Protected	5	Protected against Water Jets
6	Dust Tight	6	Protected against Heavy Seas
		7	Protected against the effects of Immersion
		8	Protected against Submersion

# mounting, installation & maintenance

## Instruction Manual

LUTEC pays a lot of attention to a user friendly and effective yet simple instructions, we strive to find time saving methods of installation using uniquely designed interfaces where possible. Every LUTEC Outdoor fixture has a clear instruction manual in the unit box and this manual can also be downloaded from our website. Clear explanations in 8 European languages.

## Service network

Our service network is available on global level through our LUTEC Partners. Contact details: [www.lutec.com/services/global-network](http://www.lutec.com/services/global-network)

# LUTEC brand identity

## packaging

The LUTEC corporate identity has been invigorated in line with our evolving brand values. New trade support tools and POSs have been created to support our products and our customers providing an integrated selling solution, all of which adds value and distinguishes the LUTEC offer from our competitors.

Recently we introduced the fully refreshed packaging, being applied to our complete portfolio. We believe the new look of the new packaging is fresh, vivid and in tune with our style of products. The product is always the hero with an inspiring photography. The refreshed LUTEC logo is visible from all sides of the packaging, together with the emblematic green banner this will further improve the brand recognition.

The LUTEC SOLAR and LUTEC SECURITY unit-box graphics are launched in the market for the newly introduced LUTEC connect Solar and LUTEC connect Camera ranges. By means of a distinctive colour indication, Orange for Solar & Red for Security, the consumers will easily recognize the difference with the standard LUTEC outdoor ranges.

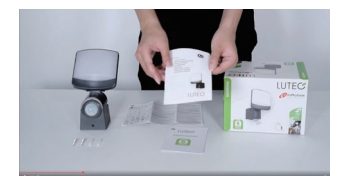

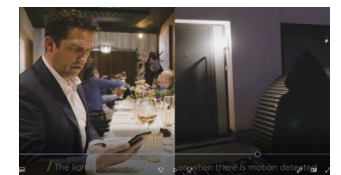

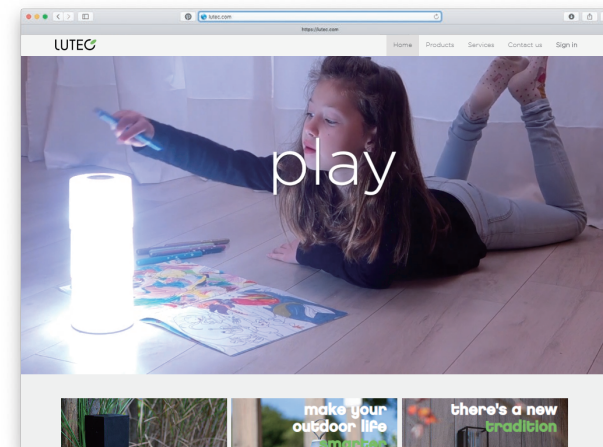

# LUTEC brand identity

## rich content

We're constantly creating new communication materials to support and improve the presentation of LUTEC products, facilitating an easy consumer selection of one of the LUTEC products.

All support materials are accessible through our refreshed website [www.lutec.com](http://www.lutec.com).

Where you can find the LUTEC database with all kind of "rich content": Product photos, Lifestyle photo's, Tutorials, Inspirational video's, Flash-Intro video's, Unpacking experiences, and many more.
